Blaser Swisslube Vasco[®] 7000 Attains Full Rolls-Royce[®] Approval for Global Use

GOSHEN, New York - Blaser Swisslube Inc., premier manufacturer of Swiss quality metalworking fluids, is pleased to announce the full global use approval for Vasco[®] 7000 from Rolls-Royce[®]. Vasco[®] 7000 is a third generation water miscible, bio-based semi-synthetic emulsion formulated with the latest in state of the art metalworking fluid components for the aerospace industry. Vasco[®] emulsions are sustainable, green chemistries and are registered for use under the USDA BioPreferred[®] Program.

Vasco[®] 7000 exhibits excellent biological and chemical stability, providing long sump life in demanding conditions without the use of secondary amines, boron and formaldehyde releasing condensates. Vasco[®] 7000 is Chlorine free and provides high cutting performance, increased productivity and long tool life for exotic alloys. Vasco[®] 7000 has been formulated and optimized for high speed milling of Titanium and nickel based alloys, and is universally applicable over a wide range of materials and machining operations. Vasco[®] 7000 has excellent washing action and very low misting properties, thus providing a high level of machine and shop cleanliness. Vasco[®] 7000 is formulated for use in hard or soft water conditions and provides good foam control in moderate to high coolant pressure applications.

Blaser Swisslube is a globally active company in the metalworking fluid sector. The independent and family-owned Swiss company was founded in 1936 and has since grown from a small business into a global player, employing over 500 people worldwide. Today, in the USA, a team of 40 co-workers collaborate with about 50 national distributors to ensure good product availability and a professional level of customer support. With these subsidiaries and representative offices, Blaser Swisslube is able to provide a high level of customer service as well as remain close to its customers in 60 countries. Blaser Swisslube develops, produces and sells high-quality cutting and grinding fluids. Blaser's liquid tool[®] is used worldwide with great success to produce a wide range of products, from the tiniest of components for the watchmaking industry, to human implants for the medical field. Aircraft and aerospace companies have been successfully manufacturing flight critical and structural components for many years with Blaser Swisslube metalworking fluids. Blaser provides a wide range of products which meet many aerospace approvals and specifications. For more information on how Blaser Swisslube can boost your shops productivity, please visit www.blaser.com.
