Blaser Swisslube Introduces Blasocut[®] BC935SW

GOSHEN, New York - Blaser Swisslube Inc., premier manufacturer of Swiss quality metalworking fluids, is pleased to announce the release of Blasocut[®] BC935SW. Blasocut[®] BC935SW is formulated with the latest in state-of-the-art metalworking fluid components. Blasocut[®] emulsions provide excellent bio-chemical stability and long sump life. This is due to the unique bio-concept of Blasocut[®] emulsions and is accomplished without the use of bactericides, while maintaining a high level of environmental health and safety.

Blasocut[®] BC935SW is chlorine free yet provides high cutting performance and long tool life in cast iron, steel, aluminum and exotic alloys and is formulated for use in machining applications over a wide range of materials. Blasocut[®] BC935SW has excellent washing action and low misting properties, thus providing a high level of machine and shop cleanliness. Blasocut[®] BC935SW exhibits excellent bio and chemical stability and is formulated for use in water with a maximum hardness of 140 ppm. Blasocut[®] BC935SW provides excellent foam control in moderate to high coolant pressure applications.

Blaser Swisslube is a globally active company in the metalworking fluid sector. The independent and family-owned Swiss company was founded in 1936 and has since grown from a small business into a global player, employing over 500 people worldwide. Blaser Swisslube is represented in about 60 countries, close to its customers. The company develops and produces high-quality cutting and grinding fluids and its customers produce, with great success, a wide range of products, from the tiniest of components to large, critical and structural components in all manufacturing industries.

Blaser Swisslube's goal is to optimize its customers' manufacturing processes with the liquid tool and to improve their economic efficiency, productivity as well as the machining quality. In close cooperation with the customers and based on a holistic view of the manufacturing process, Blaser Swisslube presents the possibilities to fully exploit the potential of machines and tools by using the right metalworking fluid which becomes a liquid tool. This promise is backed by excellent products, customized services, competent experts and its long experience in the metalworking industry. For more information please visit www.blaser.com.
