## Fluid Control

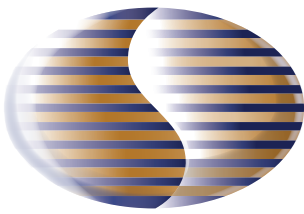

The SRS Fluid Control Group is an ISO 9001 certified provider of Fluid Control/Chemical Management Services. We are not a manufacturer of chemistries; but instead focus on providing on-site service and a systematic approach to the management and optimization of chemicals and lubricants within manufacturing facilities. The Fluid Control Group employs a targeted approach focusing on reducing the total cost of manufacturing for our client base.

### Are any of the following true of your facility?

- Would you benefit from immediate and guaranteed cost reductions?
- Do you utilize water based industrial fluids in your manufacturing process?
- Do you dispose of Industrial Fluids?
- Are you currently unsatisfied with your fluid recycling efforts?
- Would you benefit from implementing an ISO certified Fluid Management program?
- Would you benefit from having a non fluid supply as your Fluid Manager?

The Fluid Control Group provides a variety of broad based programs and services that are designed to meet client needs and deliver the best combination of technology and products to reduce operating costs while meeting your environmental commitments. You can have the SRS Full Service Fluid Management program with no initial capital investment or risk.

- **Life-Cycle Approach to Fluid Management**

Management of fluids from product selection through purification and re-use means better performance for fewer dollars.

- **Unbiased Chemical Selection**

SRS is not a chemical manufacturer. This allows us to provide you with an unbiased approach to management and selection of fluids

- **Reduced Chemical Consumption**

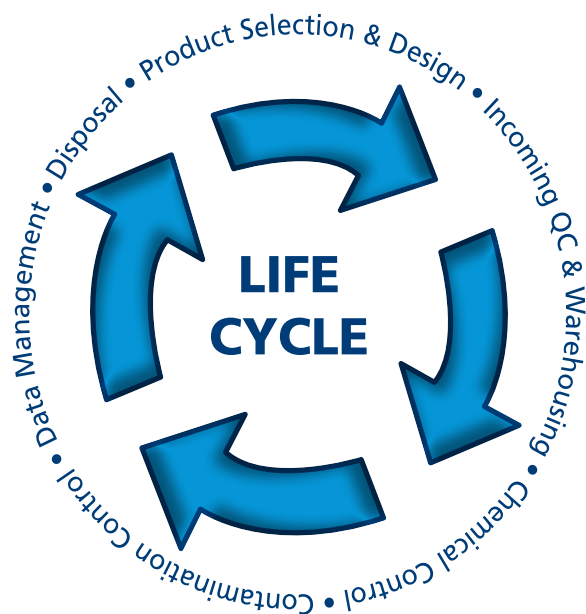

By tightly controlling fluid dilution and incorporating fluid recycling our customers have seen an average 75% reduction in chemical usage.

- **Target Zero Disposal**

By implementing our proven Fluid Control program along with our purification technologies, we are able to reduce total off site disposal by an average 85% and GUARANTEE zero disposal of most water-based fluids.

- **Increased 14001 conformance**

with our on-site waste prevention program
